Digital Skills and Curricula

Governments across the developed world are grappling with the issue of how digital skills fit into their nation's curricula

Every state and territory other than NSW is teaching digital technologies as a subject in 2018. Shutterstock

Email Australian schools are now wrestling with a new digital technologies curriculum. In this new subject, every student in Australia will learn the fundamentals of computer science, data science and coding.

Digital curriculum deadline unrealistic, teachers' union fears

Katy Jones • 15:40, Nov 04 2018

SUPPLIED

Teachers take part in a series of digital training workshops being held across the country, by digital educator "The Mind Lab". Its founder Frances Valintine, visits Nelson on Thursday to talk to educators about what the digital revolution means for schools.

An Entitlement Curriculum

1. Digital Technology for Learning

All students should experience how to utilise digital tools in collaborative, creative ways to help develop their knowledge and skills in their chosen disciplines

2. Digital Technology for Life

All school leavers should be ready to apply digital tools in productive ways in their chosen life paths

What? - The Digital Passport

The New Digital Technologies Curriculum

A simple, fun, online course to assist Year 1-10 teachers to unpack terminology, gain expertise, and develop the confidence to use digital technology to enhance learning.

An Online Solution

To simplify the curriculum and its stages

To structure the learning

To provide ideas and resources
